

Keep in mind

The series Working Papers on Economics is published by the Office for Economic Studies at the *Banco de la República* (Central Bank of *Colombia*). It contributes to the dissemination and promotion of the work by researchers from the institution. This series is indexed at Research Papers in Economics (RePEc).

On multiple occasions, these works have been the result of collaborative work with individuals from other national or international institutions. The works published are provisional, and their authors are fully responsible for the opinions expressed in them, as well as for possible mistakes. The opinions expressed herein are those of the authors and do not necessarily reflect the views of Banco de la República or its Board of Directors.

In this theoretical report, the identifiability property of a coincident index model is studied. As a result,

---

characterization of the identifiability conditions solves a model specification problem, which was detected in the design of an earlier index for the Colombian economy. Key words and phrases. Coincident economic index, model identifiability, state space model.
