The Magic Coin

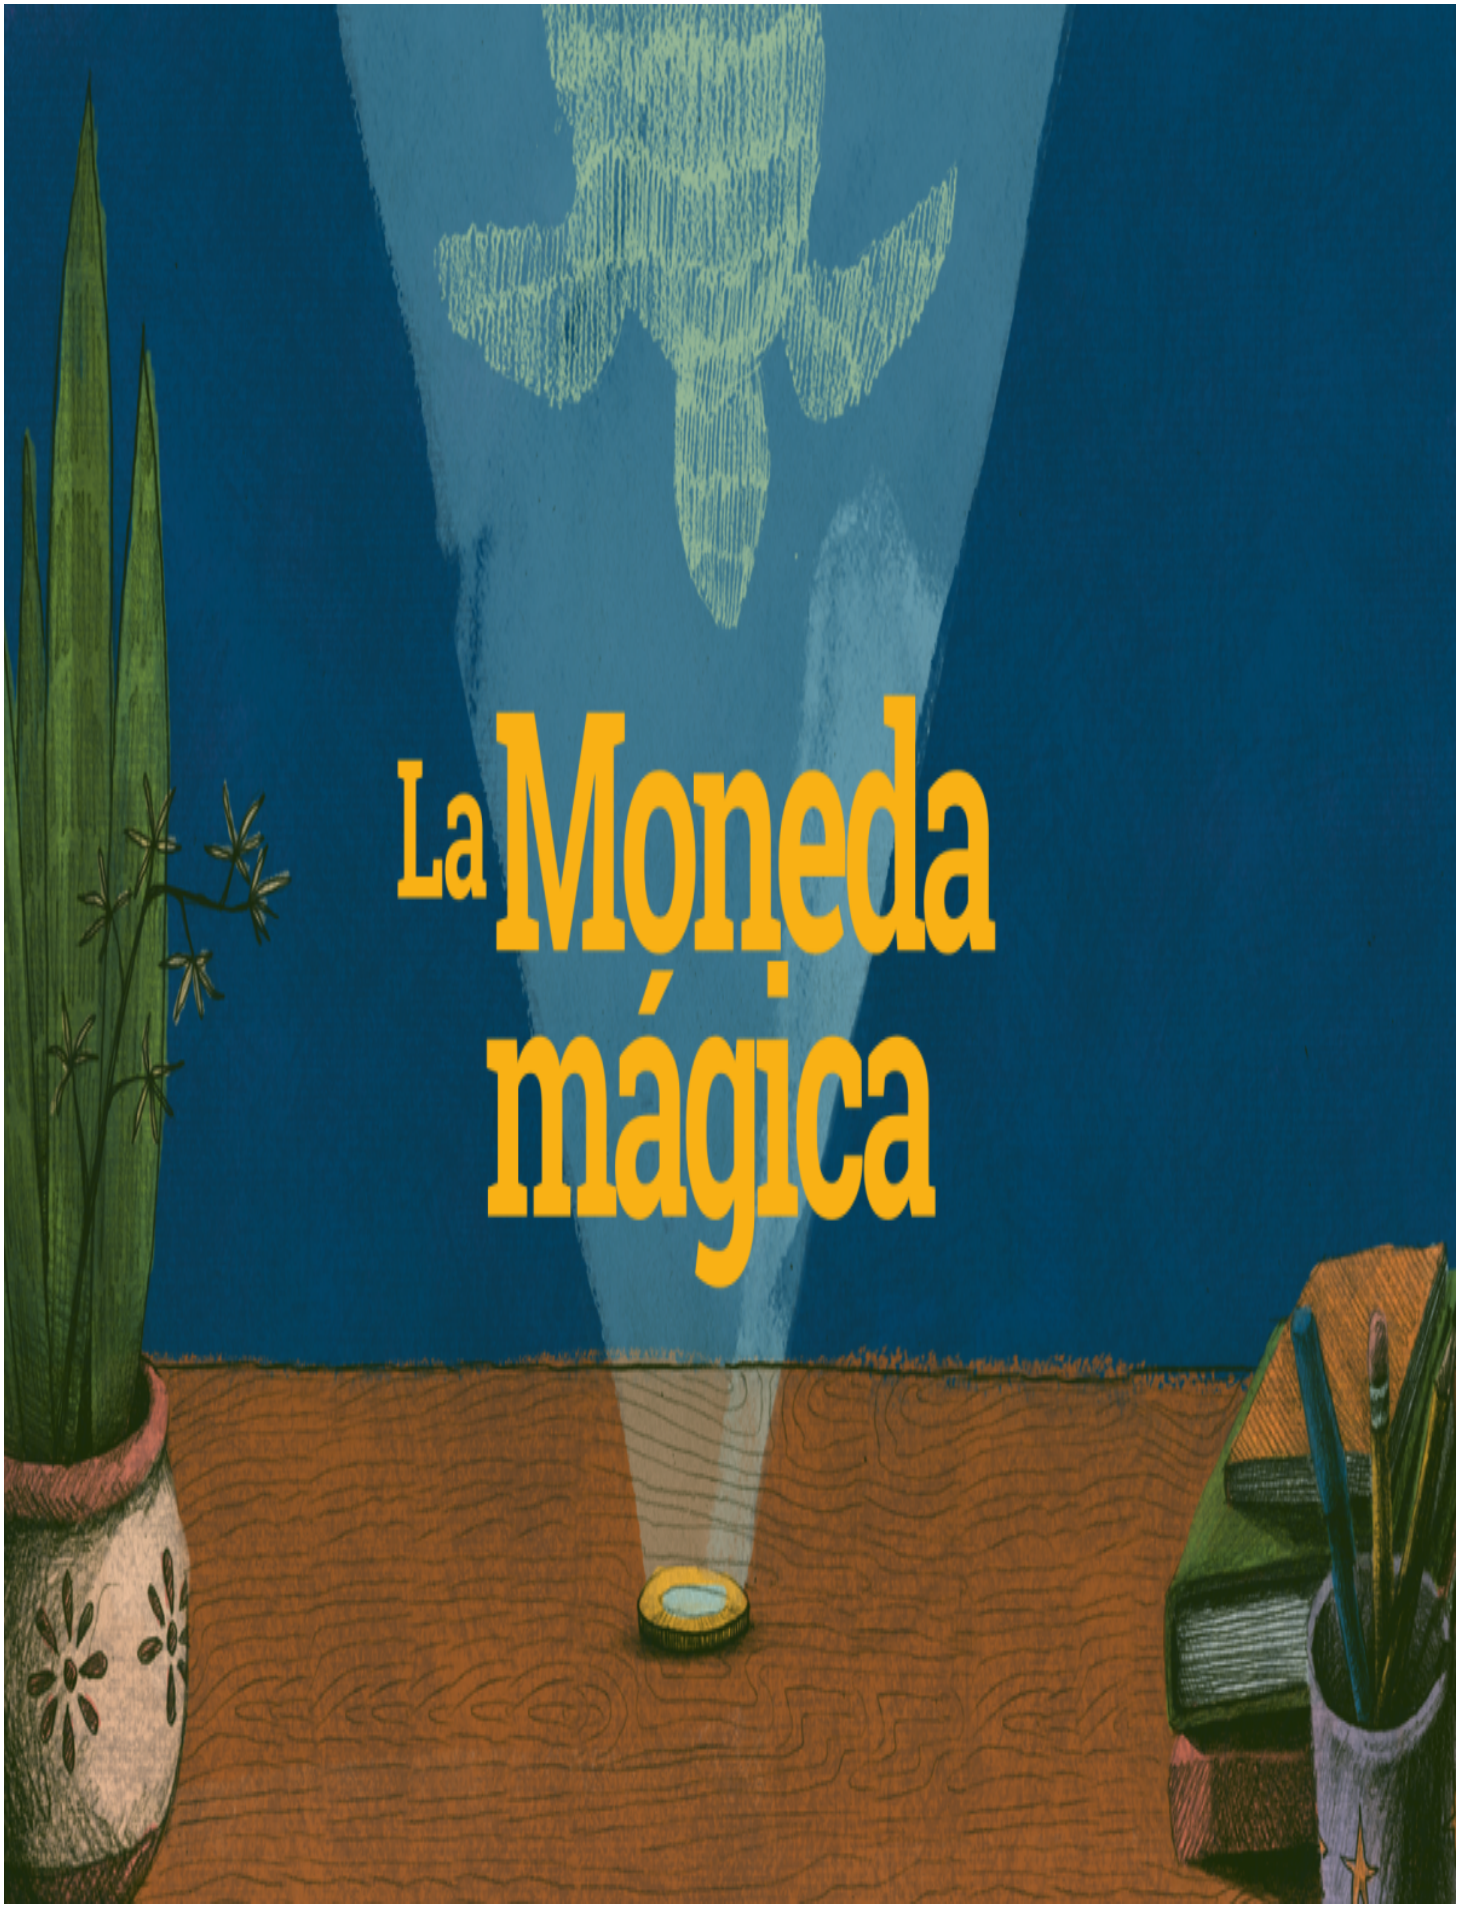

Wednesday, 21 February 2024 - 12:00

The Magic Coin is an animated pedagogical game that is part of the economic education program BanRep Educa. It aims to promote children’s understanding of basic economic concepts in a simple and didactic way.

Through this game, participants will:

- Recognize the concept of barter and its connection to savings.
- Compare the saving of money today with the saving of resources in the past.
- Identify Banco de la República (the Central Bank of Colombia) as the only authorized entity to issue Colombian banknotes and coins.
- Understand why the excessive creation of money can cause inconveniences for social well-being, and relate this to the concept of savings.
- Relate savings to the rational use of natural resources to preserve the environment and protect the well-being.

Do not forget to download the Teacher's guide to complete the activity and click on the next image to enter the Workshop:
