Quarterly Update of the Financial Stability Report – September 2024

Quarterly Update of the Financial Stability Report – September 2024
This document provides an update on the main risks faced by the local financial system. It assesses the quarterly evolution of vulnerabilities identified in the Financial Stability Report for the first half of 2024: i) sudden changes in global financial conditions; ii) materialization of credit risk; and iii) deterioration in the performance of financial institutions. Additionally, this update seeks to inform financial market participants and the public about the main risk mitigants and to present the in-depth analyses that will be featured in the *Special Reports on Financial Stability* and the *Financial Stability Report* for the second half of 2024.
